The Syncplayer | Features sheet

Big screen for text and images

Enrich your presentation with vibrant images, diagrams and animations.

Engage with users

Make eye contact with your audience by including a human presenter to guide them through your presentations.

Simple-to-use controls

Viewers can move back and forth from section to section, pause and start over with ease, allowing them to make the most of your material.

Translations / subtitles

Broaden the reach of your presentations by adding subtitles in multiple languages that display exactly when you need them to.

Supporting downloads

Bundle related resources together with your presentations so that users have everything they need in one place.

Brand awareness

Stay on-message with consistent branding - we'll brand your Syncplayer presentations with a selected logo and colourways.

User feedback

Learn more about how your users respond to each presentation by including feedback forms and quizzes.

Share socially

Encourage visitors to share your presentations with friends and colleagues using the 'send to a friend' or social networking buttons.

Data capture

Collect and store information from users. We'll work with you to ensure that data generated from forms and quizzes can be easily transferred to your existing systems.
